This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Notes.

1. The arrangement of the Michigan University Book is by Departments—in the order of their seniority.

2. The lists of names are in their class form. In the "Literary Department" the introduction of names of non-graduates presents a class in 1844—though it did not graduate "*in course.*" The first class was graduated Aug. 6, 1845. B. A. was the only degree conferred until 1855, when B. S. appeared; C. E. in 1857; M. E., 1868; B. Ph., 1870; and B. L. 1880. The Resident, or Post-Graduate Students appear in 1856. Non-Graduates are in the lists of all classes, save one. Specialists were admitted in 1855—class of 1859—and continued until 1879. Proper headings separate these class subdivisions.

3. Index references are to "class years," which are found in the upper corners of the pages. The page number is at the bottom. Abbreviations used in Index references are explained on page 305. Those used in the "Index of Residences and Occupations" are explained on page 343, and refer to occupations only. In that Index firm names composed of Alumni are in Roman, with individual names in *italics* below.

4. The arrangement of matter is: (*a*) Name in full, if known; (a middle letter not followed by a period (.) indicates that there is nothing beyond the initial.) (*b*) Degrees taken; (mention of the Bachelor's degree is omitted, if a Master's has been conferred.) (*c*) Birthplace and year of birth, if known; otherwise (in Literary Department and School of Pharmacy only) residence at time of Matriculation, with year of entering college. (*d*) In case of attendance at another college, the name of college, with years of attendance—if no degree was received—designated by figures 1, 2, 3, 4, for Fresh., Soph., Junior or Senior, respectively. For Non-Graduates, years of attendance at the University are designated in the same way. (*e*) Personal history. (*f*) Titles of books published, or statement of literary or scientific work done. (*g*) Membership in Learned, Scientific, or Professional Societies. Last, present residence.

5. An interrogation (?) indicates, that no recent authentic information has come to hand touching the statement to which it is annexed.

6. An asterisk (*) indicates the decease of the person, whose name it precedes.

7. In the list of Officers, Biographical Notes are appended solely to the names of those deceased.

8. Biographical data of all kinds concerning former Officers or Students of the University, and corrections of errors in this work, are earnestly desired, and may be sent to either, the University Steward, H. D. Bennett, Esq., at Ann Arbor, or to T. R. Chase, 31 Edmund street, Detroit.

N. B. Look at Appendix for additions and corrections.

Index of Residences and Occupations

OF PERSONS NAMED IN THE

MICHIGAN UNIVERSITY BOOK.

EXPLANATION.

Names are given of those only who are supposed to be living and engaged in business as indicated. Students in college, deceased persons and those from whom no information can be had, are omitted. In some cases the residences here given are not the same as those in the body of the University Book. The changes are made on information received since that was printed, and are presumed to be the most accurate.

The figures following names refer, the first, to the "class year" of the person named, the second, to the pages where his personal history may be found.

A (?) query indicates that no recent information has been received from the person named, and the author's letters lately sent to this address, have not been answered.

When a firm is named, which consists entirely of "University men," the firm name is first given in Roman, with individual names under it in *italics*.

The names of firms composed in part of "University men," are given in *italics*.
